¹Hybrid ARM consists of an initial fixed-rate period followed by a floating-rate period. During the floating-rate period the coupon is based on the 30-day Average SOFR + 325 bps margin. Every six months, the floating rate may increase or decrease by up to 1%, never be less than a floor of the initial fixed interest rate and never be greater than a maximum lifetime cap of the initial fixed interest rate + 5%.

²

Prepay description: For example, for a Hybrid ARM “321(3), 1%” refers to 3% for year 1 of the fixed-rate period, 2% for year 2, 1% for the next 3 years, then 1% during the remaining floating-rate period.

³

Higher of yield maintenance (YM) or 1% during the YM period. See Fixed Rate notes for details.

⁴

With respect to Hybrid ARM mortgage loans with yield maintenance, for any prepayment made during the yield maintenance period, the prepayment charge will initially be the greater of (i) 1.0% of the unpaid principal balance or (ii) yield maintenance. Any prepayment made after the yield maintenance period, the prepayment charge will be 1% of the unpaid principal balance. See Hybrid ARM notes for details.
